Marvin Interior Finishes

Begin with the ideal finish

Stained and ready to go

Before a window or door is assembled, every piece of wood is put through our proprietary multi-step, integrated conditioning and staining process. As part of this process, the wood is conditioned, sanded and baked to ensure a more ideal, lasting and beautiful finish.

Painted interior finishes

Or opt for a beautifully painted interior finish that meets WDMA TM 14-09 standards where a coat of primer and a separate coat of paint are applied to each piece of wood before the window or door is assembled - providing an even, high quality, consistent finish with lasting durability. Custom interior paint colors are also available.

Environmental advantages

By implementing practices that promote environmental responsibility, we are able to capture VOC’s released during the finishing process.

Note: Stain colors are shown on Pine. To see all six beautiful finishes visit Marvin.com or download the Marvin® Finishes app.
